Automatically balances the pool water 24/7

CO<sub>2</sub> Injection for pH Control

***The Absolute  
Easiest Way  
to Balance  
a Pool***

Eliminate muriatic acid for pH control

Combat the skyrocketing prices of chemicals

CO<sub>2</sub> Injection for pH Control

The Healthy Alternative in Pool Maintenance

## Pool balancing becomes a breeze

pH PURE is a brand-new product that will revolutionize the residential pool market. The unit injects trace amounts of safe and natural CO<sub>2</sub> (carbon dioxide) into the pool's water, basically performing the duties of what muriatic acid does. This will balance the pH and total alkalinity automatically around the clock. This same technology has been safely and economically used on commercial pools for decades.

With pH PURE, you will be able to eliminate the need for muriatic acid to balance the pH and sodium bicarbonate to balance the total alkalinity. The savings in chemicals will pay for itself in no time at all.

- Compatible with all sanitizing systems including salt-chlorine generators
- Approximately 1/5th the cost vs. using muriatic acid & sodium bicarbonate
- Cutback on hauling, storing and swimming in hazardous chemicals
